**CLASS HYSTEROSCOPY:**

WHERE  
**HYSTEROSCOPY** MEETS  
**ULTRASOUND**

In the last years, **integration** between **Hysteroscopic Surgery** and **Ultrasounds** has become fundamental. **Gynaecologists performing endoscopic surgery** should be able to perform **gynecological ultrasound** to diagnose benign and malignant diseases and also to guide **some careful procedures**.

The course aims to provide the necessary knowledge and practical skills to treat simple and complex pathologies under ultrasonographic guidance. The programme consists of **theoretical lessons**, **clinical cases from CLASS Hysteroscopy Center** and **hands-on-training sessions** according to the **ESGE GESEA Program**, using transvaginal simulators, ultrasound machines, hysteroscopic trainers (wet and dry lab, GESEA HYSTT 1 and 2 exercises).
